

## Bottles For Optimal Sampling, Transportation and Preservation

Expro's objective is to provide the oil companies with a wide range of oil and gas bottles to adopt to specific needs. The customer can purchase or rent the bottles as preferred. All bottles are mercury free, and delivered with valves and carrying cases for safe handling and transportation.

### Oil Bottles

#### PetroLight® bottle

Expro's PetroLight® bottle, is a titanium light weight, non-corrosive oil bottle with an internal ring for sample agitation.

#### PetroLight® 700/1000/4000 Titanium

Capacity	700,1000 or 4000 cc
Pressure	700 cc and 1000
cc	690 bar @ 65°C
4000 cc	830 bar @ 65°C
or	690 bar @ 170°C
Material	Titanium
Weight	6, 8 or 45 kgs

#### Pro-Light bottle

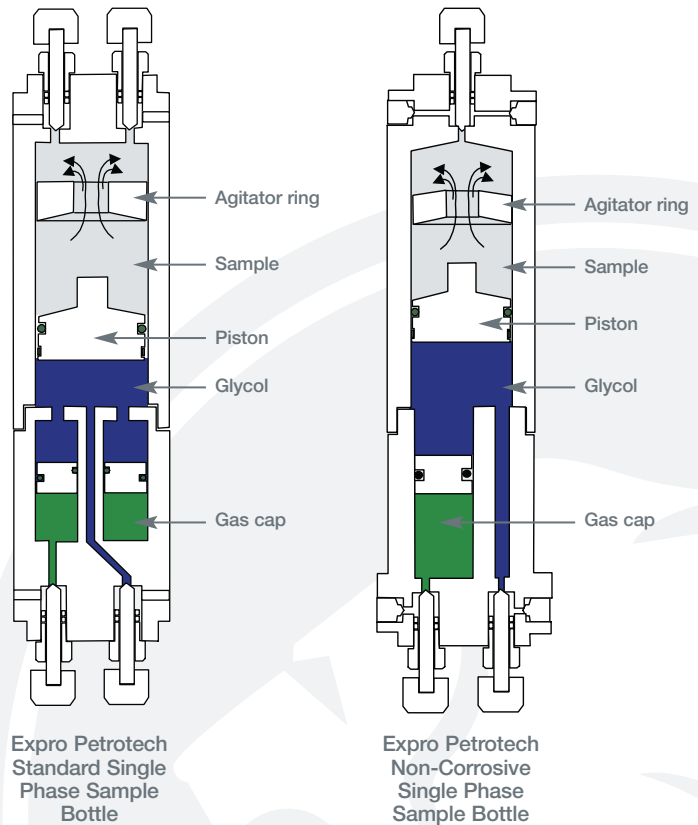

The Pro-Light bottle is a light weight titanium bottle with an integrated ball for agitation during determination of bubble point.

#### Pro-Light 700 Titanium

Capacity	640 or 1000 cc
Pressure	690 bar @ 65°C
Material	Titanium
Weight	5 or 6,5 kgs

#### Pro-Strong 1400 Titanium

Capacity:	700 or 1000 cc
Pressure:	1400 bar @ 65°C
Material:	Titanium
Weight:	12 or 15 kgs

## Bottles For Optimal Sampling, Transportation and Preservation

### Single Phase Sample Bottles

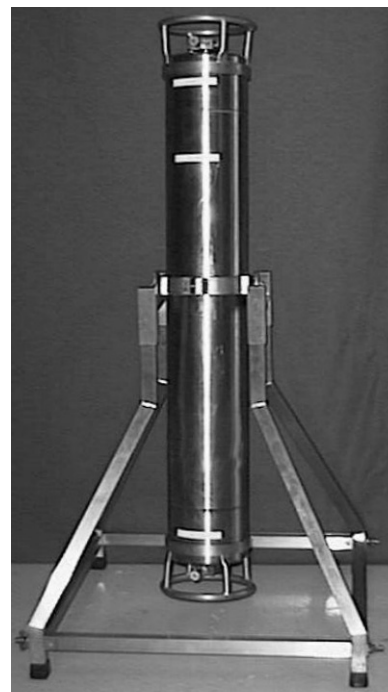

A single-phase sample bottle is an unique system for monophasic PVT sample transportation, keeping the sample at virgin pressure all the way to the laboratory. A large mass profiled agitation ring is used to agitate the sample during bubble point determination. The valves are incorporated in the end caps, and the non-rotating valve tip allows repeatable low torque high pressure sealing. Expro also offers a non-corrosive version of Single Phase Sample Bottle. This bottle is designed for extreme conditions and allows analyses of chemicals components such as H<sub>2</sub>S, mercaptane and mercury.

#### Standard Single Phase Sample Bottle (SSB)

Capacity	700 cc
Pressure	700 bar @ 120°C
Material	17/4 PH
Weight	25 kgs

#### Non Corrosive Single Phase Sample Bottle (NCSSB)

Capacity	700 cc
Pressure	1000 bar @ 180°C
Material	Inconel
Weight	27 kgs

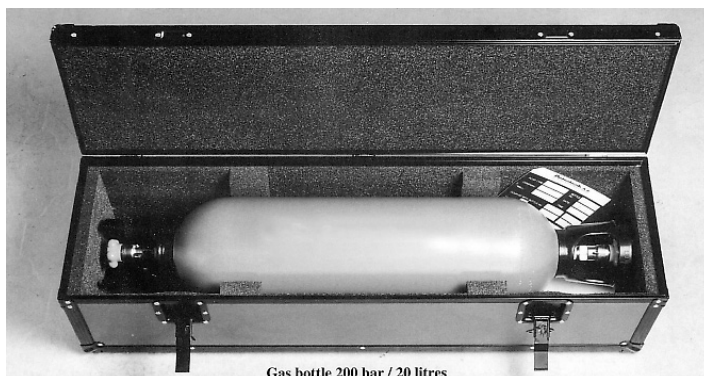

### Gas Bottles

#### Luxfer 200

Capacity	20 litres
Pressure	200 bar
Material	Aluminium
Weight	25 kgs

#### Small gas sample bottles

Capacity	150, 300 and 500 ml
Pressure	125 bar 5000 cc
Material	316SS

Gas bottle 200 bar / 20 litres

### Low Pressure Bottles

Expro also offers a variety of low pressure sample bottles and cans (sales items).

Aluminium bottle 1 litre

Low metal content plastic bottle - 0.5 litre

Low metal content plastic bottle - 1 litre IATA

Low metal content plastic bottle - 5 litres IATA

Low metal content plastic bottle - 25 litres IATA

Taymar gas bottle IATA

Jerry can, plastic 18 litres IATA

Jerry can plastic 10 litres IATA

Jerry can plastic 5 litres IATA

Gas teflon sampling bag 2 litres IATA

Glass sampling vessel 0.5 litre

Epoxy coated drum
