

AX-S™ all areas

Monthly AX-S update - Bringing riser-less intervention in up to 10,000ft of water Issue 3

Tool storage package (TSP) starts assembly

Main pressure housing being lowered into TSP frame

Welcome to the third edition of AX-S all areas, a monthly update showing the progress of the build of AX-S.

As you can see from the main picture the Tool Storage Package (TSP) has started its build program.

Highlights:

- TSP kitted and build starts
- 1/4 scale testing successfully passes first series of tests – one more to go
- Well control package in final plumbing and wiring phase
- Control cabin hooked up to allow direct programming from Davis in California

TSP pressure housing being moved into the vertical position

TSP pressure housing installed in frame
