

## 24", 100,000ftlbs Fully Rotational Torque Machine

Expro's new state of the art torque machine is now available and operated by our highly trained staff, providing customers with the following specification:

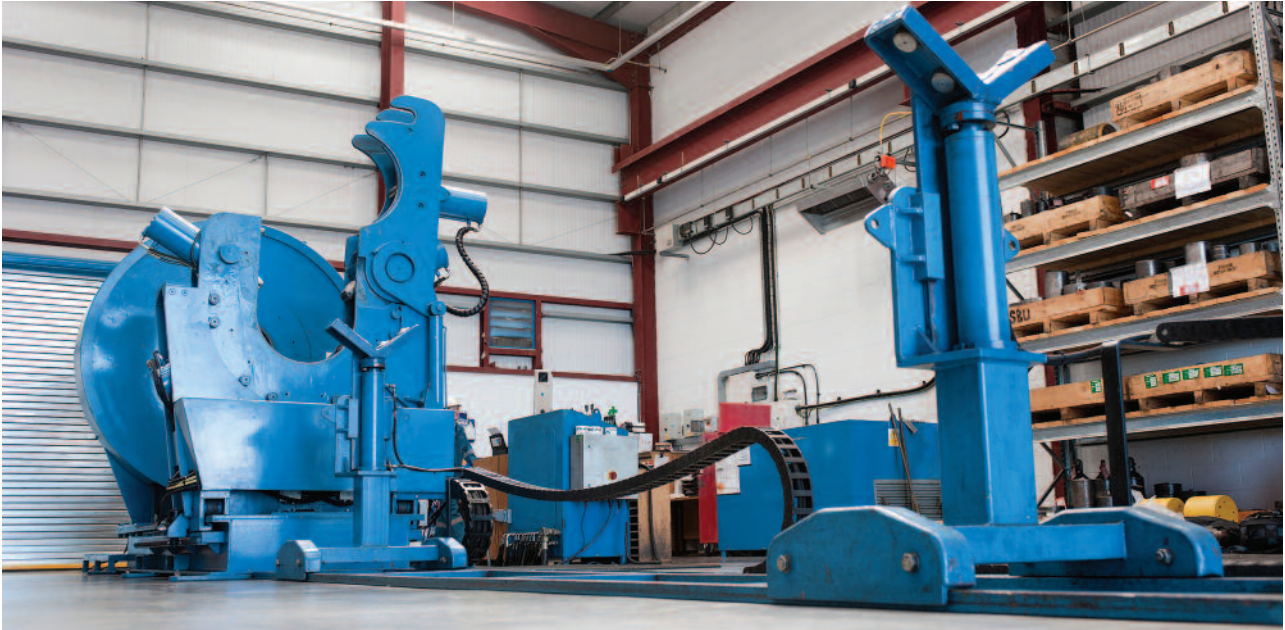

- 3" – 24" handling system
- Fully rotational torque system
- 100,000 ftlbs of torque force
- Fully automatic
- Computer system with torque report capability
- Designed for heavy downhole drilling tubulars and production tubing (premium connections)
- Top open tailstock allowing larger tool OD's between heads

Our modern dedicated torque workshop facility offers the following capacity:

- 10t overhead crane
- Dedicated pressure test bay (5 ft x 12 ft)
- Safe access for 16 tonne trucks (and under) to drive into the workshop and park adjacent to the torque machine.

Our torquing service is managed in accordance with our registered ISO 9001:2000 Quality Management System and industry leading Health, Safety and Environment Performance. All operatives are dedicated to providing total customer service and meeting individual torquing specifications and needs of valued customers.

## 24", 100,00ftlbs Fully Rotational Torque Machine

Torque calibration traceable to UKAS standards

### Benefits:

ISO 9001 registered quality Management Systems  
Industry benchmark HSE performance  
Trained and competent torque technicians

### Modern workshop facility:

- 24" torque machine
- 10 ton overhead crane
- Responsive service – efficient, safe and quality turnaround to deliver customer satisfaction
- 24hr turnaround (depending on size)
- Pre booked jobs can be performed whilst lorry waits

### Applications:

Connection make / break capability  
Service / load test hanger, running tool and pup assemblies

### Technical Specification:

New torque machine  
100,000 ftlbs torque  
24" handling system
